

سری سوال: یک ۱

زمان آزمون (دقیقه): ۴۰ تشریحی: ۰

تعداد سوالات: تستی: ۳۰ تشریحی: ۰

درس: متون زیست شناسی

رشته تحصیلی/کد درس: زیست شناسی (عمومی) ۱۱۱۲۰۲۵

1- Each cell is surrounded by a.....

- | | |
|--------------|--------------------|
| 1. nucleus | 2. plasma membrane |
| 3. cytoplasm | 4. cytosol |

2- What cell in plants loses its nucleus in the process of maturation?

- | | |
|---------------------------|-------------------------|
| 1. Phloem sieve tube cell | 2. Algae and fungi cell |
| 3. Red blood cell | 4. Skeletal muscle cell |

3- What is the name of regions included of endoplasmic and ectoplasmic together ?

- | | | | |
|-------------|-----------|-----------|--------------|
| 1. Apoplasm | 2. Stroma | 3. Matrix | 4. Cytoplasm |
|-------------|-----------|-----------|--------------|

4- Plant cells have made of cellulose provides support for the plant body.

- | | |
|--------------------|----------------|
| 1. plasma membrane | 2. ribosome |
| 3. cell wall | 4. chloroplast |

5- Who was the first person to observe the cell by a lens in 1665?

- | | | | |
|---------|-----------|-----------|-----------|
| 1. Hook | 2. Darwin | 3. Mendel | 4. Watson |
|---------|-----------|-----------|-----------|

6- The members of a freely interbreed and produce fertile offspring.

- | | | | |
|----------|----------|------------|----------|
| 1. class | 2. order | 3. species | 4. genus |
|----------|----------|------------|----------|

7- What is the name of fertilized ovum before cleavage?

- | | | | |
|-----------|----------|--------|-----------|
| 1. gamete | 2. Sperm | 3. Egg | 4. Zygote |
|-----------|----------|--------|-----------|

8- A gamete is.....

- | | |
|---------------|---------------------------|
| 1. haploid | 2. diploid |
| 3. fertilized | 4. not a mature germ cell |

9- Which organisms have simple systems for the release of eggs and sperm into the sea?

- | | |
|------------------------------|-------------------------|
| 1. Sea stars and sea urchins | 2. Whale and sea stars |
| 3. Whale and sea urchins | 4. Tapeworms and flukes |

10- The flowers are

- | | | | |
|--------------------|--------------------|--------------------|------------------|
| 1. modified leaves | 2. modified petals | 3. modified sepals | 4. modified root |
|--------------------|--------------------|--------------------|------------------|

11- Spermatozoa are remarkably alike in the animal kingdom, except for

- | | |
|-----------------------------|--------------|
| 1. arthropods | 2. nematodes |
| 3. arthropods and nematodes | 4. mamalians |

12-What is the name of respiratory organ of water-breathing animals?

1. Nose 2. Lung 3. gill 4. Wing

13-..... is consisting of many cells?

1. Single-celled 2. Multicellular 3. Monocellular 4. Unicellular

14-What is the name of a class in phylum protozoa having root-like feet for locomotion?

1. Flagellata 2. Rhizopoda 3. Ciliata 4. Sporozoa

15-Which one have relatively simply systems for the release of swimming sperm to near by egg-bearing archegonia?

1. ginkgo 2. Rose 3. Sunflower 4. Ferns

16-The organism that causes malaria in a human being is a.....

1. Virus 2. Bacterium 3. fungus 4. protozoan

17-Which one have false feet?

1. Amoeba 2. Bacteria 3. Viruses 4. Tapeworms

18-It is believed that the first animals started their lives in....

1. Desert 2. Mountain 3. Sky 4. Water

19-The protozoa reproduce....

1. sexually 2. fusion
3. division 4. sexually and asexualay

20-Which one is a bridge between the plant and animal kingdoms?

1. Flagellata 2. Rhizopoda 3. Ciliata 4. Sporozoa

21-What is the name of basic unit of inheritance?

1. gene 2. Chromosome 3. Trait 4. RNA

22-It is only at the time of cell division that can be easily seen.

1. chromosomes 2. lysosomes 3. ribosomes 4. nuclei

23-Which one is in the ferredoxin structure?

1. Fe 2. Al 3. Mg 4. Mn

24-Which one is in the chlorophyll structure?

1. Mn 2. Cu 3. Fe 4. Mg

25-The enzymes of dark reactions are located in the

1. Matrix 2. Cytoplasm 3. ER 4. Stroma

26-What is not the result of light reactions in photosynthesis?

1. ATP 2. NADPH 3. O₂ 4. glucose

27-A photon increases the energy of an electron, moving it from.....

1. an outer orbital to inner 2. an inner orbital to outer
3. a high energy level to low energy 4. a high energy level to higher

28-The energy transmitted by waves through space or some medium is.....

1. radiant energy 2. chemical energy 3. ATP 4. respiration

29-What is the name of sweet substance secreted by special glands in flowers and in certain leaves?

1. Candy 2. Nectar 3. gum 4. glucose

30-NaCl in the soil is a

1. biotic factor 2. abiotic factor
3. living factor 4. good factor for glycophyte plants
